

# Thomas Shehan

## FULL-STACK SOFTWARE DEVELOPER

Enthusiastic web developer with a love of problem solving, a focus on clean, manageable code, client oriented service and drive to help others succeed.

### PROJECTS

#### Tekken7 Frames - Full-Stack Developer

January 2019 - Present - <https://github.com/tkshehan/t7-client>

- Lightweight web-crawler to regularly retrieve frame data from reliable sources.
- API in Express.js/Node.js providing up to date frame data to myself and other developers.
- Front-end React/Redux webapp continuously under development.

#### Lichess Opening Search - Full-Stack Developer

August 2018 - <https://github.com/tkshehan/chess-openings>

- An accessibility focused static web application for Lichess.org users to gather data on their past games.
- Mobile-first, responsive design, following a11y best practices.
- Additional resources integrated from multiple outside sources for the convenience of the end-user.

#### Simple Packing - Full-Stack Developer

October 2018 - <https://github.com/tkshehan/packing-planner>

- A mobile-first web app for planning, saving, and printing checklists for frequent travelers.
- Features mongodb, express, express-routers, and delivered through browserify for a modulated development environment.
- Continuous integration and testing through Travis-CI.

### HIGHLIGHTS

#### Charlotte JS Study Group

January 2019 - Present

- Actively attend a weekly meetup for Javascript developers.
- Assist attendees with personal, business, and student projects.

#### Additional Information

- I am committed to continually improving both my knowledge of additional technologies and frameworks, but also my existing skills and nuances of my languages.
- Writing readable and well structured code, modules, and making the best use of the tools available is something I strive to improve every day.
- With a history in customer service, I take joy in helping others, and always learn something new in the process.
- For working demos of my projects please visit my portfolio at <https://tkshehan.github.io/portfolio/>
